

## **PLUNGER CONVEYED PLUNGER RETRIEVING TOOL AND METHOD OF USE**

### **ABSTRACT OF THE DISCLOSURE**

A wellbore plunger retrieving tool including a substantially cylindrical retrieving plunger body having a reduced diameter top end and an opposed bottom end. The body bottom end has a threaded recess. A plunger receiving collet includes a threaded male top end engageable with the threaded recess and an opposed bottom end with a plurality of extending fingers. The fingers are

5 capable of flexing to engage a downhole stuck plunger.
